(a)

Total energy flow (log J.y^{-1})
1000
100
10
1
0.1
10^{-6}
10^{-4}
0.002
0.05
Proportion of overall functional hull covered by bromeliad

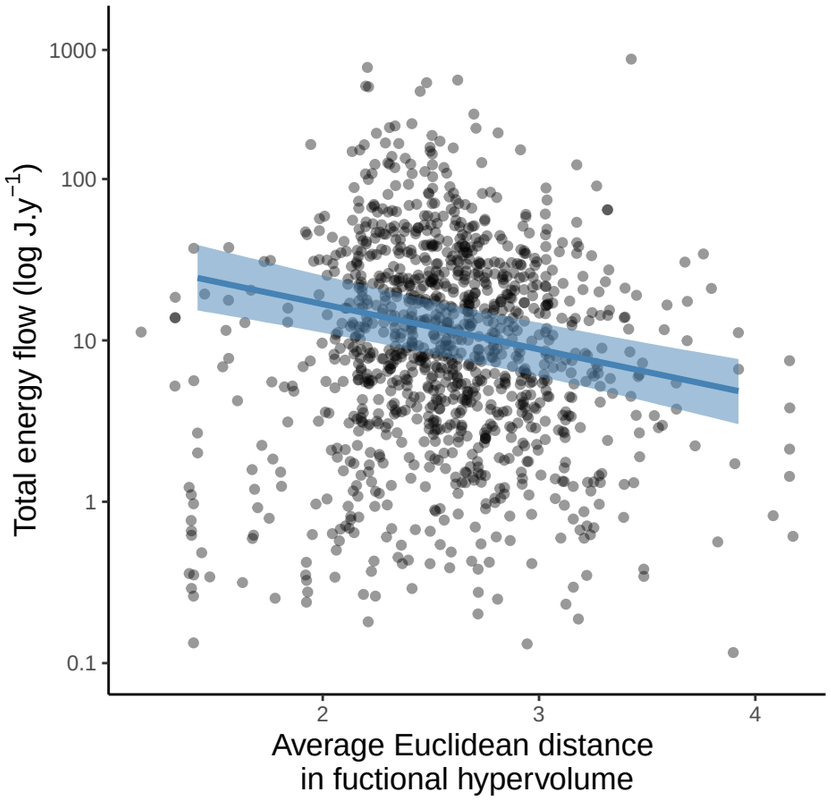

(b)

Energy flow to predators (log J.y^{-1})
1000
150
10
1
0.1
0.005
0
10^{-6}
10^{-4}
0.002
0.05
Proportion of overall functional hull covered by bromeliad

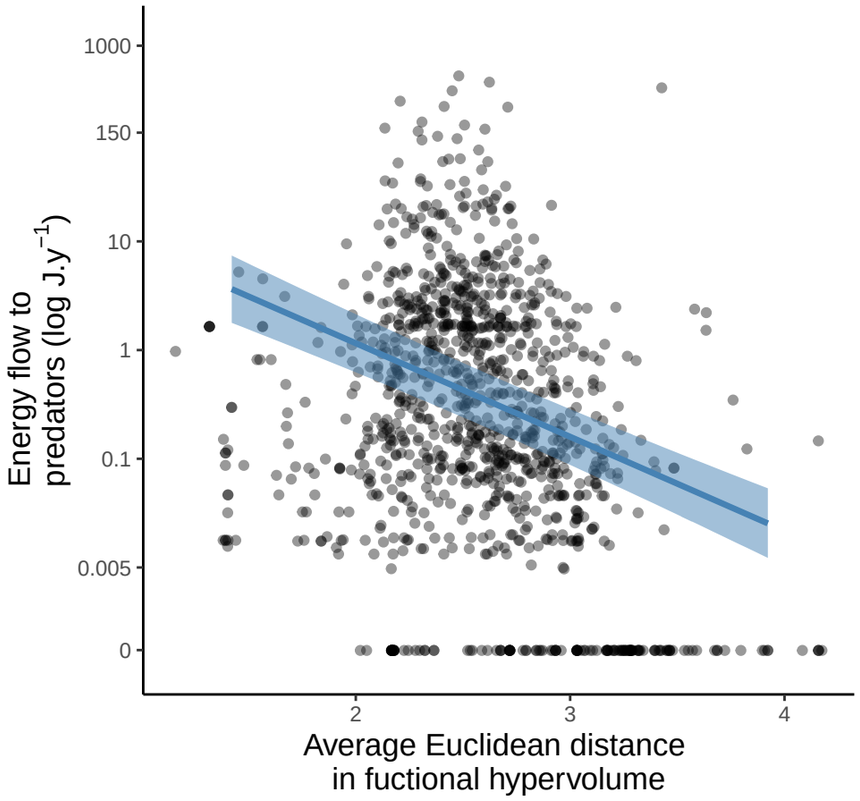

(c)

Gini index of energy fluxes
1.00
0.75
0.50
0.25
0.00
10^{-6}
10^{-4}
0.002
0.05
Proportion of overall functional hull covered by bromeliad

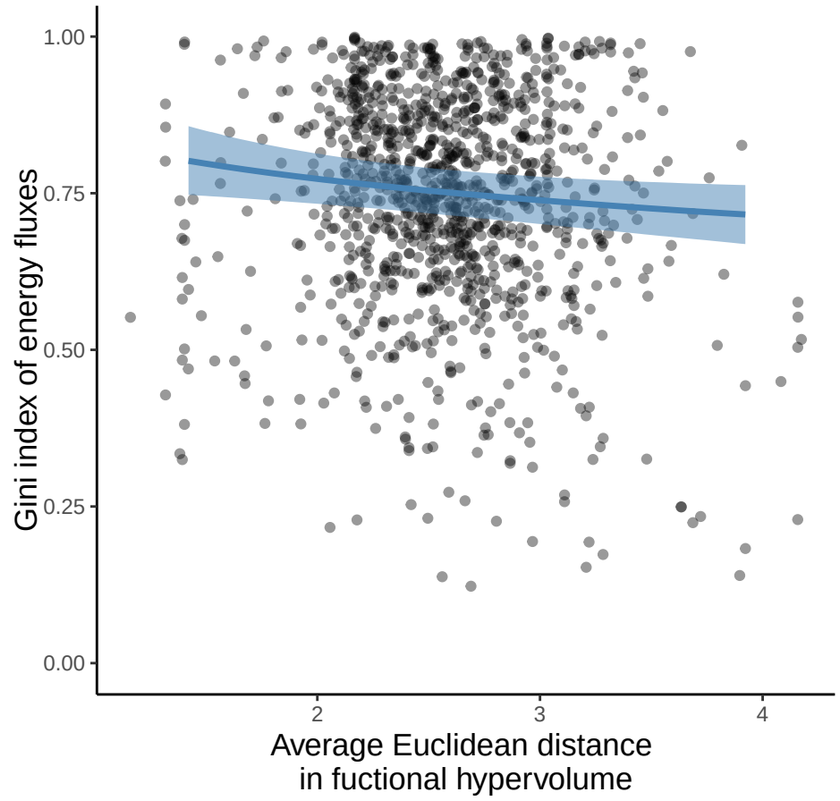

(d)

Total energy flow (log J.y^{-1})
1000
100
10
1
0.1
2
3
4
Average Euclidean distance in fuctional hypervolume

(e)

Energy flow to predators (log J.y^{-1})
1000
150
10
1
0.1
0.005
0
2
3
4
Average Euclidean distance in fuctional hypervolume

(f)

Gini index of energy fluxes
1.00
0.75
0.50
0.25
0.00
